MEMORANDUM FOR: Mr. [REDACTED]  
 SUBJECT : TSS Request for Case Materials

25X1A9a

Dick:

You may recall that after the Director's visit to a meeting of the Society for Investigation of Human Ecology in New York early in March, he told the Deputies' Meeting on 13 March that consideration should be given to releasing to the Society the records of some of our more puzzling case histories.

Dr. Gottlieb, Chief, TSS Chemical Division has prepared the attached program for such a collection effort. I have discussed this with the Office of Training and the Medical Staff, both of whom feel that the release of any case histories from our files would have to be approved by the Deputy Director (Plans), if, in fact, such material should be released from our files at all. Both Offices also believe that it would be a mistake to use on-duty staff employees for a study of this nature.

In view of the current emphasis on curtailing marginal projects, would you be good enough to take a good hard look at this proposal and let me have your views. Just give me a call on the telephone at your convenience.

Signed

L. K. WHITE
